Project Goals

Which people matter for the project?

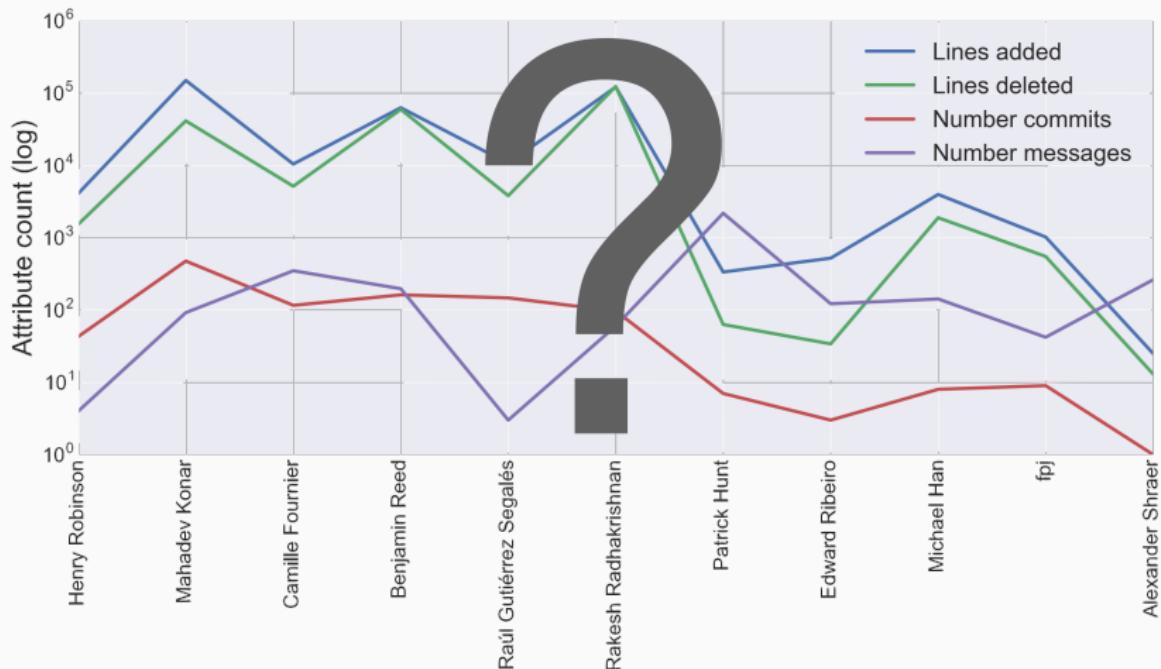

Project Goals

Which people matter for the project?

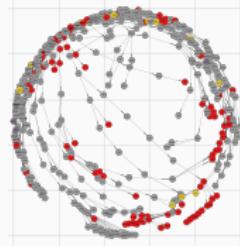

Project Goals

Which people matter for the project?

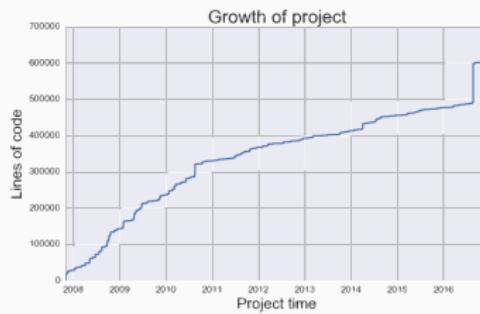

Summary: Key Findings

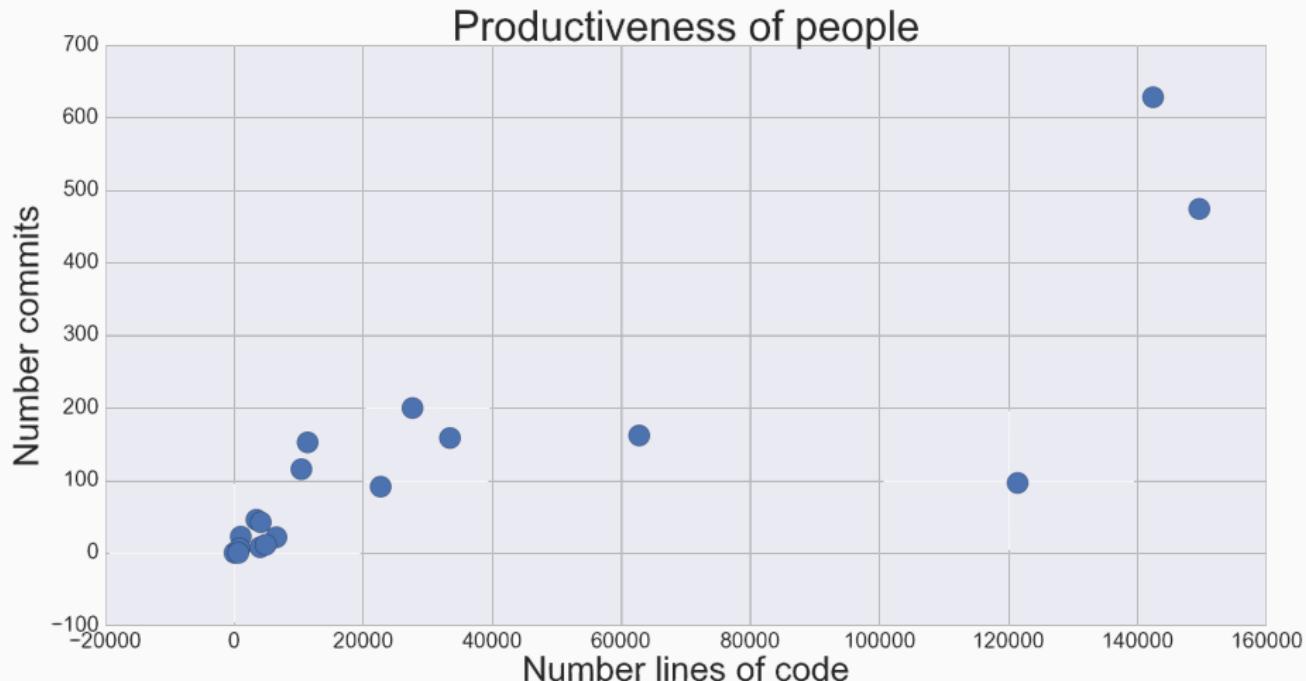

- 3 key programmers exist for the project

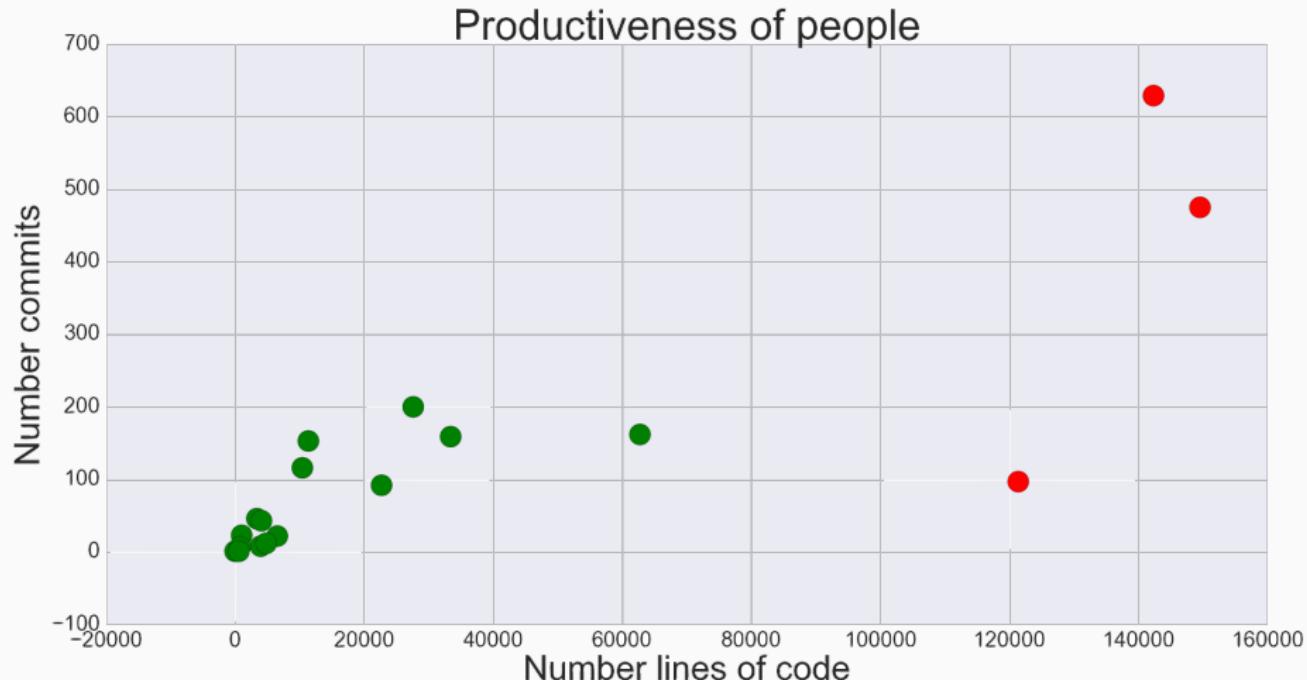

- They do significantly more work than others
- Their contribution varies with time

Contribution to codebase

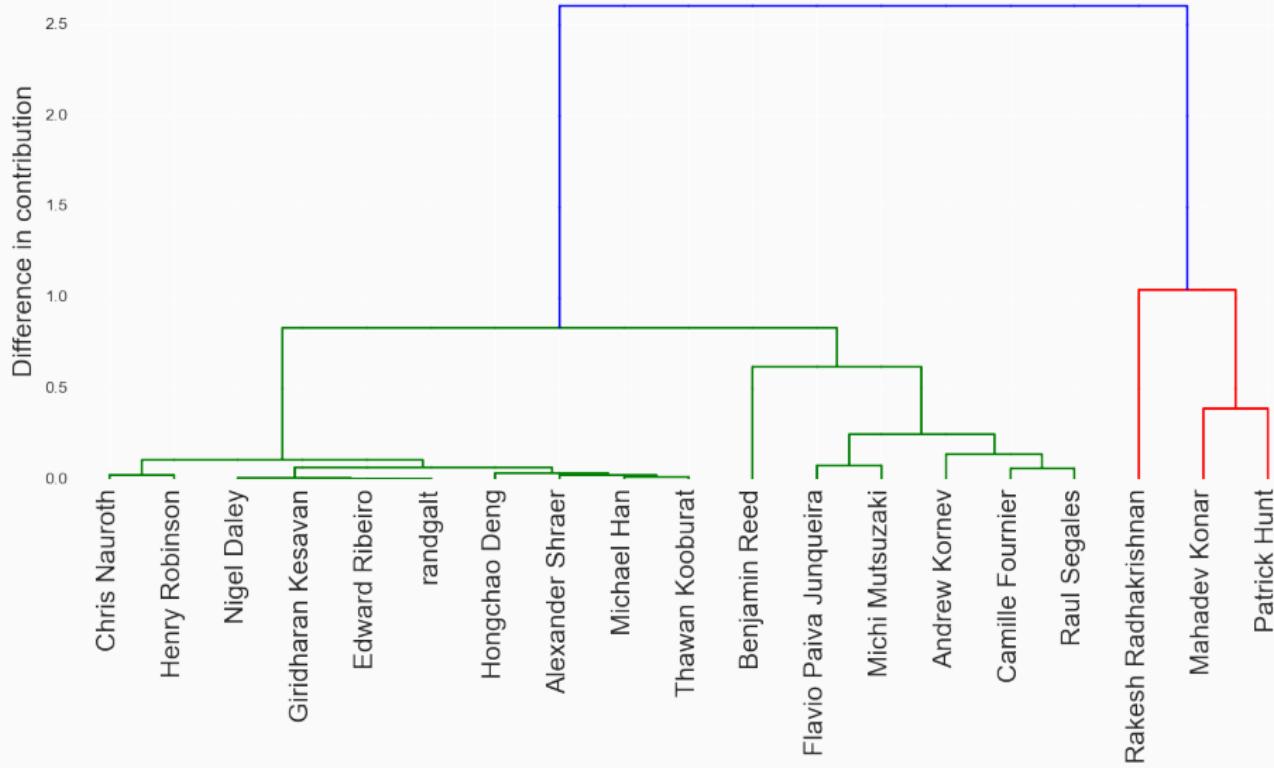

Contribution to codebase

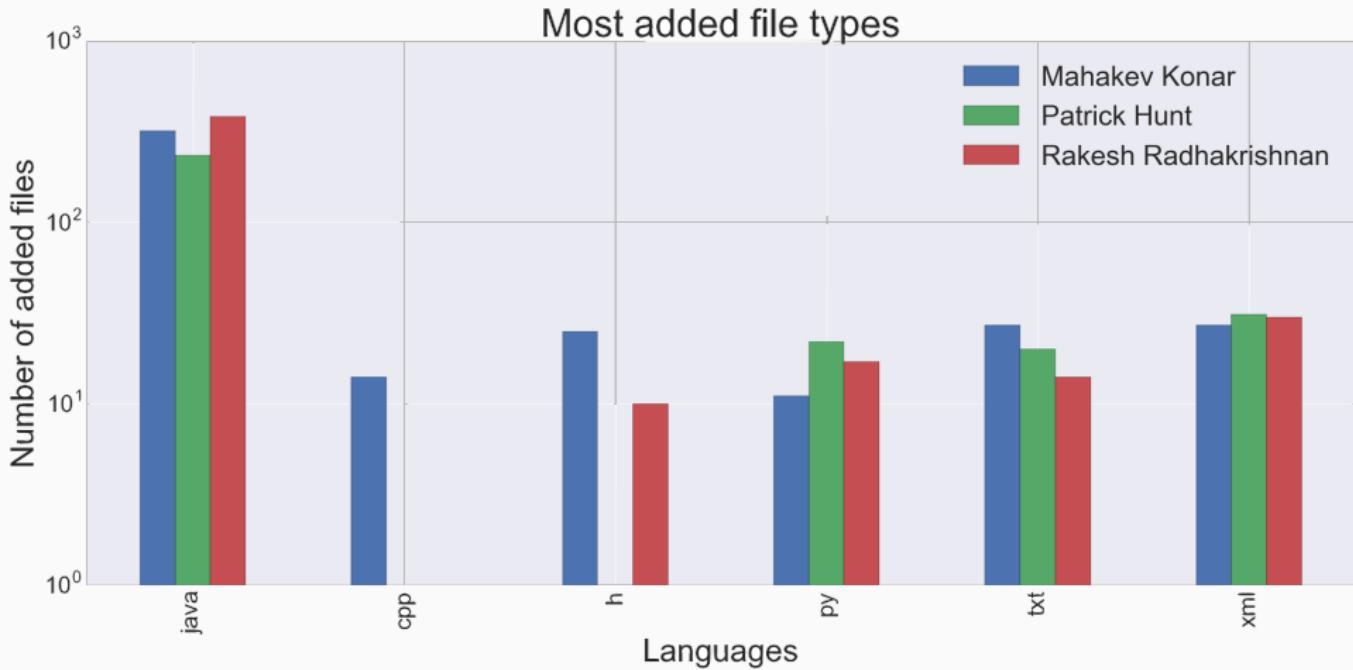

People with similar work load

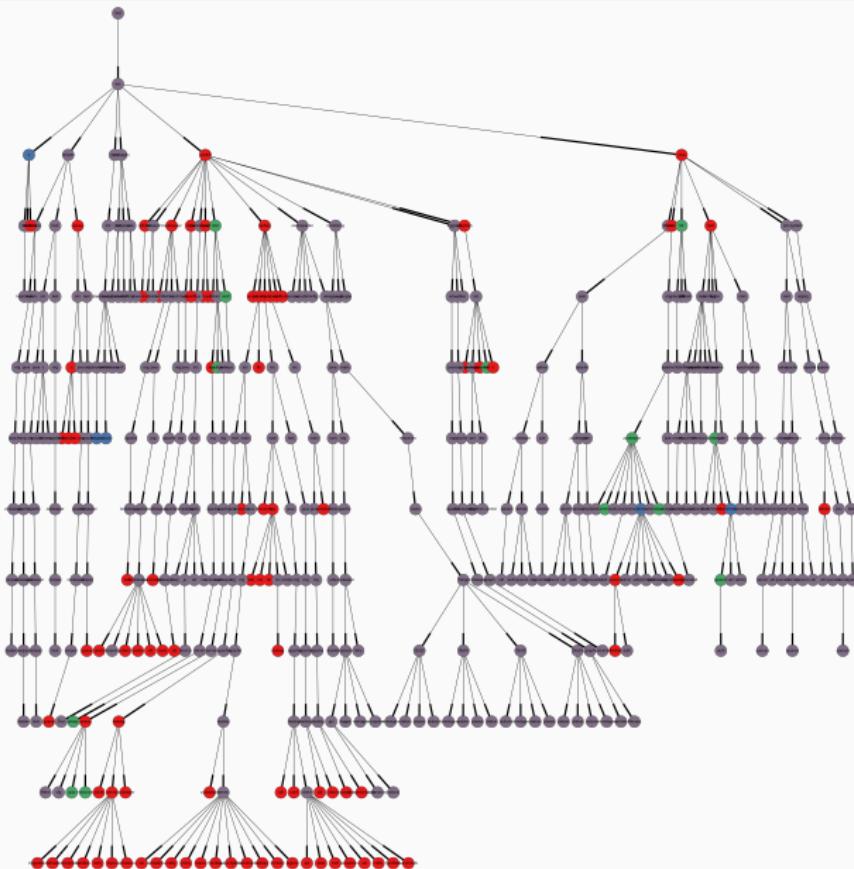

Clustering people with similar contribution

Languages of top three contributors

Contribution of top three people to codebase

Thank you!
